product overview

The Beauty of Pre-cast:

Hawk Construction's Verti-Crete pre-cast walls offer two-sided, patterned concrete products that look as great as their prices.

The Look of True Stone Masonry:

The quality and attention to detail provided by Vert-Crete is what sets our pre-cast products apart. Perfect for a variety of projects, our masonry-like pre-cast concrete is attractive enough to stand alone or serve as complementary posts for wrought iron, wood or vinyl fencing. Verti-Crete's custom molded patterns are so realistic, you'll see every detail of the natural stones used to make the molds - right down to the mortar in between the stones.

The Value of Pre-cast:

Verti-Crete products are more durable than wood, vinyl, brick or block fences and walls. Our seamless solid-panel design provides structural strength and security that will last for decades. The materials are specifically resistant to fading from the sun, and their sheer strength mean Verti-Crete can withstand all seasons and climates ... even seismic and hurricane conditions. The result is a more durable and stable sound wall, privacy fence or screen wall. Since there are no separate stones and mortar, the walls will never split horizontally.

Uses:

- Screen walls
- Sound walls
- Security applications
- Dumpster enclosures
- Privacy fences
- Horse or ranch fences
- Mailbox posts
- Signage
- Entries

RE-CAST CONCRETE STONE WALLS

✓ **column & panel system**

PANELS ARE PATTERNED ON BOTH SIDES

DURABLE COLUMNS ARE MADE OF 4000psi REINFORCED CONCRETE

Verti-Crete's Columns:

- each weigh 1700 - 1950 pounds
- are patterned on all four sides
- are set on piers with a minimum depth of 6'
- are 20" wide by 20" deep
- are available in 6', 8' or 10' heights
- are made of 4000psi rebar-reinforced concrete
- have vertical slots to hold adjoining panels in place
- can be positioned on sloping or level terrain
- can be placed in straight runs, in 45 and 90 degree turns or T's
- are finished with a decorative cap

Verti-Crete's Panels:

- are engineered to withstand windloads beyond 110mph
- are made of reinforced concrete
- each weigh 3500 - 5300 pounds
- are 12' in length
- are patterned on both sides
- are cast in one piece and will not separate or split, like our competitors' products

RE-CAST CONCRETE STONE WALLS

product installation

Our Installation Process:

The installation of Verti-Crete pre-cast walls is amazingly quick. Unlike other pre-cast products, our walls are installed on concrete footings and piers that can be poured in any type of terrain and can easily conform to any specifications. We bring the completed columns and panels to the job site, install them and custom-color them in a matter of days ... not weeks.

- Piers and footings are poured
- Columns are installed onto piers
- Panels are slid into place, resting on footings
- Panels and columns are stained to your specification

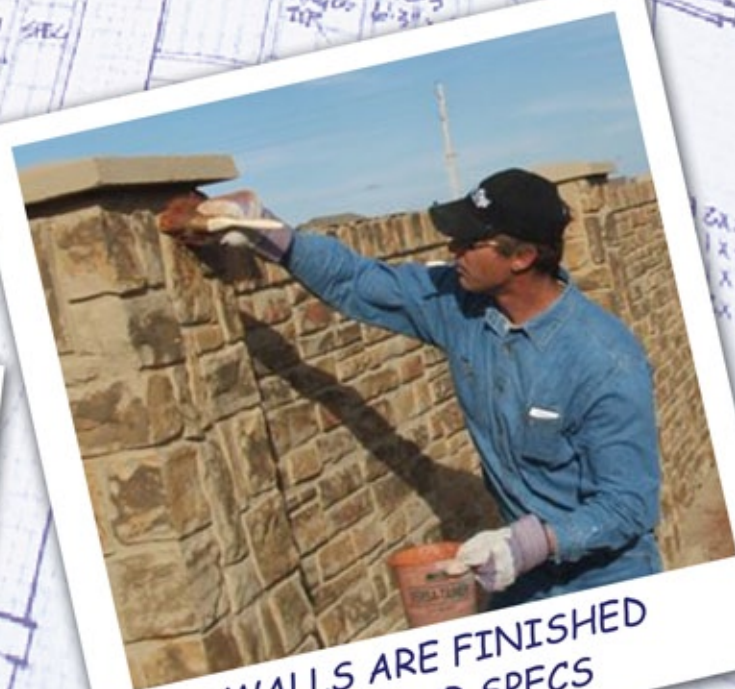

PIERS AND FOOTINGS CAN BE INSTALLED ON SLOPES
